# CUSTOMIZATION & ASSEMBLY

## NO, IT'S NOT BROKEN!

**ModularHose** is designed to be customized by popping apart the beads.

**POP!**

### MODULAR ARM

The plastic ball-in-socket arm segment is great for lightweight uses. Easily adjustable and possible.

### DOUBLE SOCKET

The segment required for a connector on both ends. Part needed for custom assemblies.

**#90614-B1k**

### MOUNTING BEAD

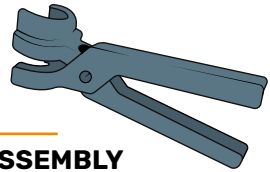

All modular hose accessories and bases come with a ball preinstalled.

### ARM SEGMENTS

2 pack of modular hose arm segments totaling 1 foot long (12 beads total)

**#61501-B1k**

### ASSEMBLY PLIERS

Our Assembly Pliers make it easier to create custom configurations.

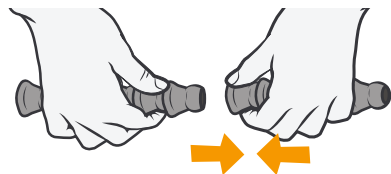

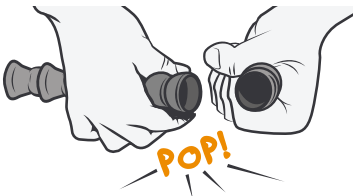

**#78004**

*Totally optional*

## HOW TO CUSTOMIZE:

To shorten length, sharply bend the arm until the bead elements POP apart. Remove or replace segments.

Add length by aligning and firmly forcing the ball into the socket with an overhand grip (or our assembly pliers).
